What's inside

The Quytech Story

Quytech is a digital dreamweaver with a vision to transform industries with the right technology. Inspired by the Vietnamese word "Quy," meaning "precious", Quytech's name reflects its commitment to creating valuable and innovative technology.

Back in 2010, when the digital landscape was still uncharted territory for many businesses, Quytech stepped in as a guiding light, offering its technical expertise and domain knowledge to illuminate the path toward technological integration.

Powered by AI, blockchain, and other emerging technologies, the intelligent apps and solutions we develop speak volumes as they consistently meet our client expectations and set the universally defined benchmark of quality, performance, security, and productivity within the industry.

Awards And Recognitions

Quytech has been recognized and awarded from time to time for achievements

Here is a glimpse into our accomplishments

The Dream Team

QUYTECH®

How we work
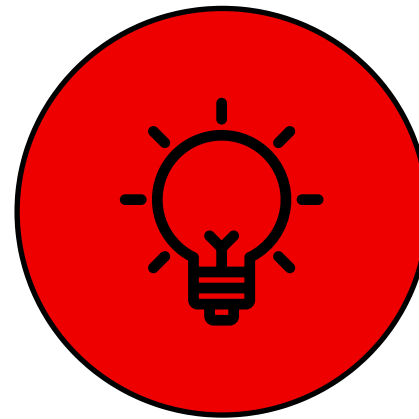

Innovate

We constantly innovate to bring you nothing but the best of technology to fulfill your digital dreams and pave the way for your business success.
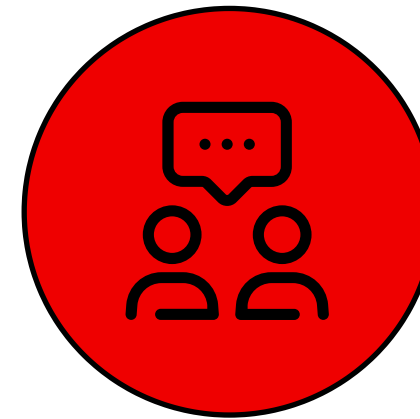

Collaborate

Honesty and transparency are the heart of how we operate. We develop a shared vision for the project to ensure the final solution aligns with your expectations.
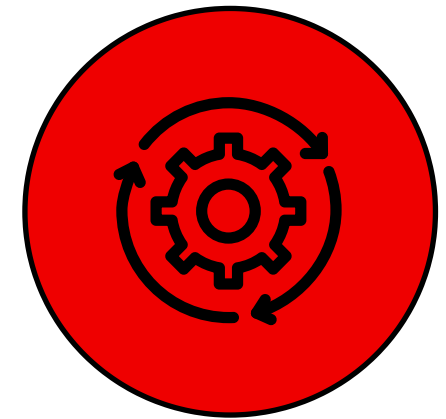

Build

Leveraging data-driven development strategies and agile methodologies, Quytech crafts custom apps and solutions that enable your business to thrive.

Innovation-Led Torchbearer of Technology

QUYTECH®

With a forward-thinking approach, we craft disruptive digital solutions to accelerate your business growth

Next

Vision for Customer's life in 3 years and strategy to win that future!

Discover & Design

Detailed research and analysis into UX and technical aspect of solution. Often ends with demo of working POC.

Build & Deploy

Iterative development process focused on throughout of software delivery using agile and DevOps practices.

Quytech Way

The Quytech Way is a set of strategies, processes and tools that infuse a unique culture in software delivery organizations.

Stage 1

Kanban Board

(I1) Core Architecture Set-up
- Infrastructure and DevOps set-up
- Create Data Model
- Build POCs of relatively high risk part of application
- Develop UI architecture - Core CSS and Page Layouts
- Develop Core APIs - CRUD operations
- Add a card...

(I2) User Onboarding and Application Access
- User must Signup as Admin on Plannuh
- User must Login to access Budget Dashboard
- User can add Company Details during Onboarding.
- User must establish a budget organization by time
- User must establish a budget amount based on timeframe
- User can organize their marketing team to add detailed budget
- Forgot password
- Add a card...

(I3) Management of Goals > Campaign > Program > Expenses
- Company admin and Team member View budget details on dashboard
- User can Add /View/ Edit a Goal
- User can Add /View /Edit Campaign
- User can Add/View /Edit Program
- User can Add /View Edit Expenses
- User can Upload an Expense csv
- Add a card...

(I4, I5) Update and Analyze Budget Hierarchy
- User can drag and drop Campaign/Program/Expenses between Goals/Campaigns/Programs
- User can access Full reporting view to see detailed reports on Budget
- Users can view reporting details for Goals/Campaigns/Programs
- Company admin can Share Dashboard with team members
- Admin can view Change logs While editing Goal/Campaign/Program/Expense.
- User can Add a new budget
- Add a card...

(I6) Import Expense
- User can specify the expenses on an xls budget hierarchy
- User can upload exp or CSV
- User can map speci the proper fields fro into an Expense Vie
- User can download Template for spread optimizes user's exp
- User can manually and/or Quarter to ex xls or CSV upload
- User can export exp

Quytech Way

QUYTECH®

The Quytech Way is a set of strategies, processes and tools that infuse a unique culture and ensure on time delivery.

On Time Delivery

• *Focus on feature delivery over system velocity.*
• *Agile, self-organized teams for product success.*
• *Nimble team structure for efficient throughput.*

DevOps,continuous integration

• *Seamless DevOps and workflow integration.*
• *Flexible contract management.*
• *Focus on automation and continuous improvement.*

Test Driven Development (TDD)

• *Continuous testing for high-quality code.*
• *Bug-free development with frequent feedback.*
• *Ensures maintainable and reliable software.*

Domain Expertise

• *Industry wise domain experts*
• *Decades of technology experience*

Quytech Proprietary Process

• *Custom methodologies for better outcomes.*
• *Encouraging innovation and collaboration.*
• *Ongoing evaluation of new technologies.*

The Quytech Way™

Scale across organization

ONCE PROVEN IT GOES ACROSS PRODUCT LINE

QUYTECH®

Adaptable, networked, customer centered end to end processes, made of small connected-empowered teams, highly automated, small batch workloads, addicted to data and speed to value
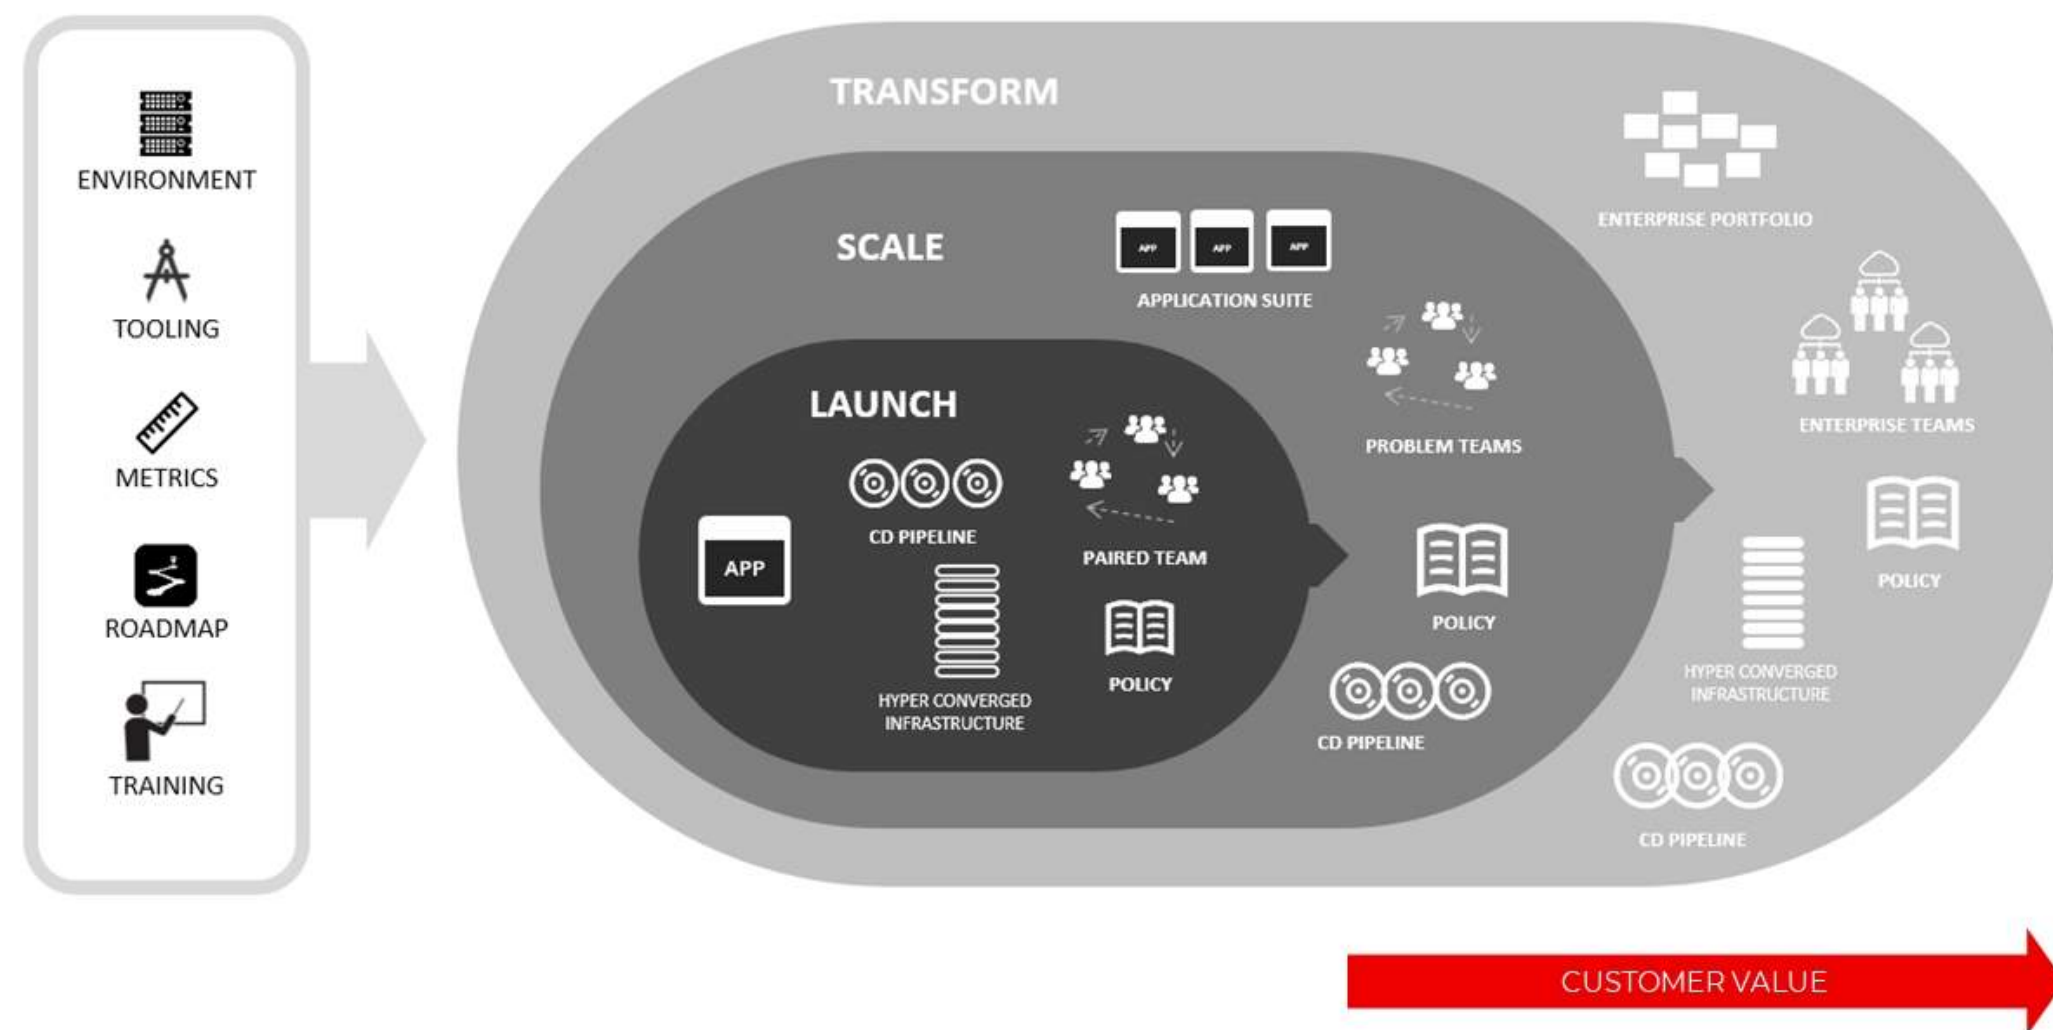

Stage 4

Some of our Blockchain based work

QUYTECH
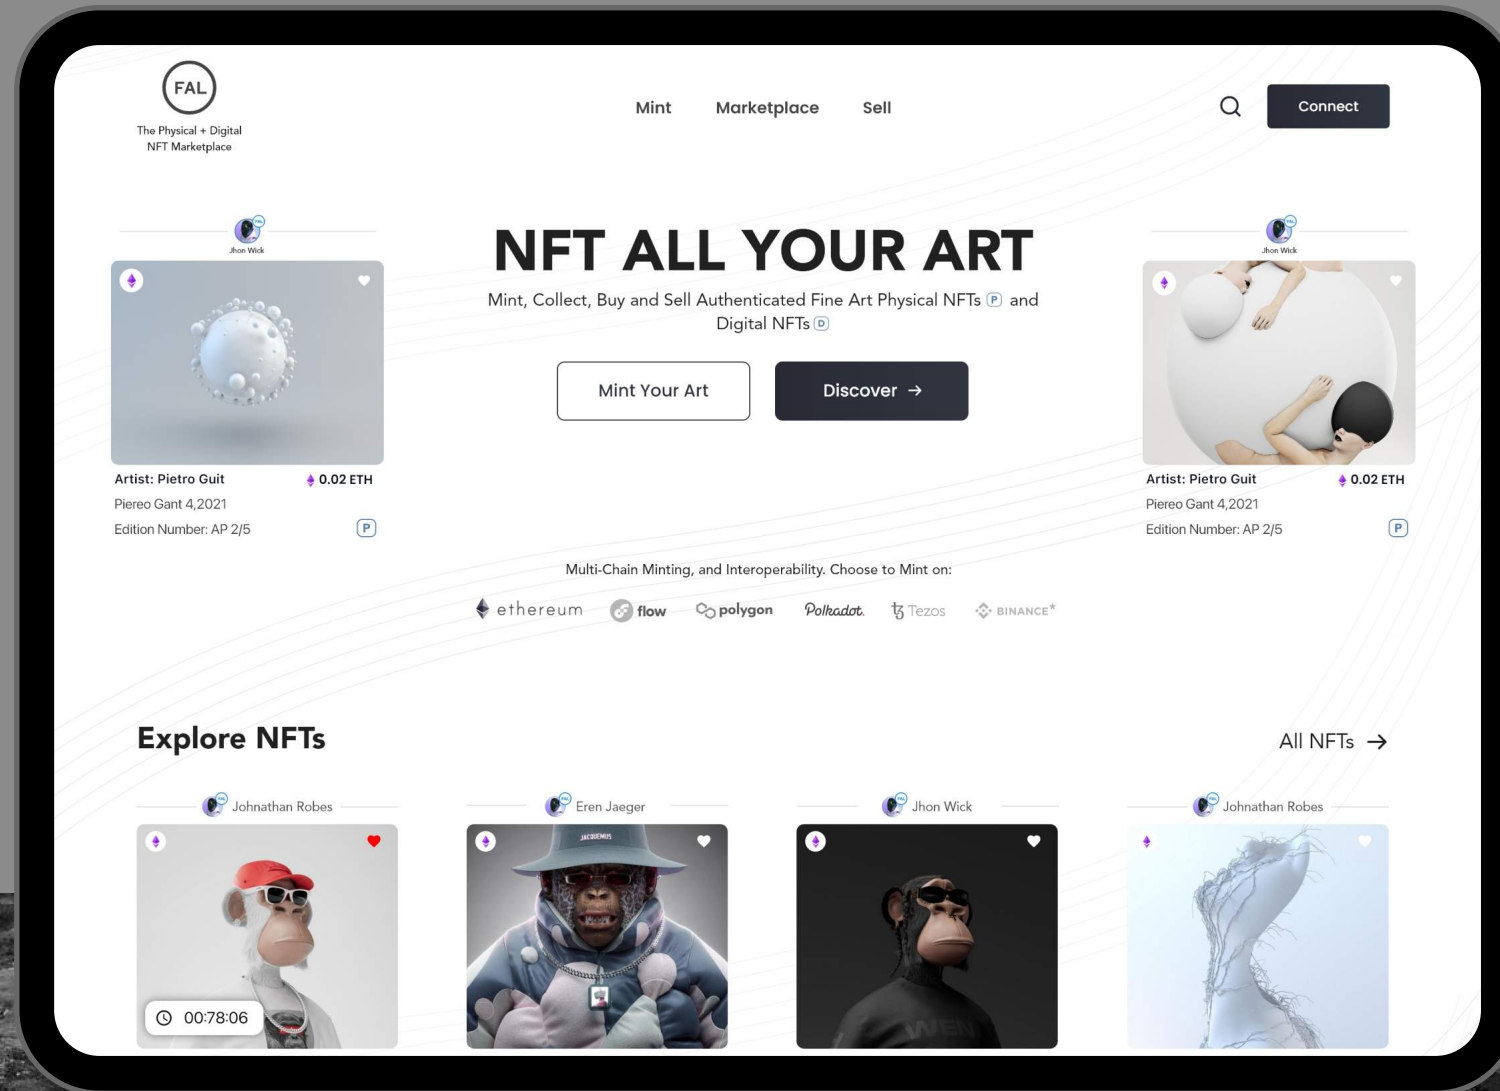

Fine Art Ledger(FAL) ———

Quytech has built a scalable NFT marketplace that allows users to trade digital art using cryptocurrency. It features art from well-known artists; users can also sell their physical art by joining FAL with a simple identity check.

www.quytech.com

NFT Marketplace ———

Quytech has developed Metaprops, an NFT Marketplace platform with advanced features where users can exchange crypto, create NFTs directly from the platform, and trade exclusive digital art such as NFT collectibles.

Sport Trade ———

A unique blockchain-based
sports betting platform where
users can bet on multiple sports
events using smart contracts
and decentralized odds for
transparency and fairness.

www.quytech.com
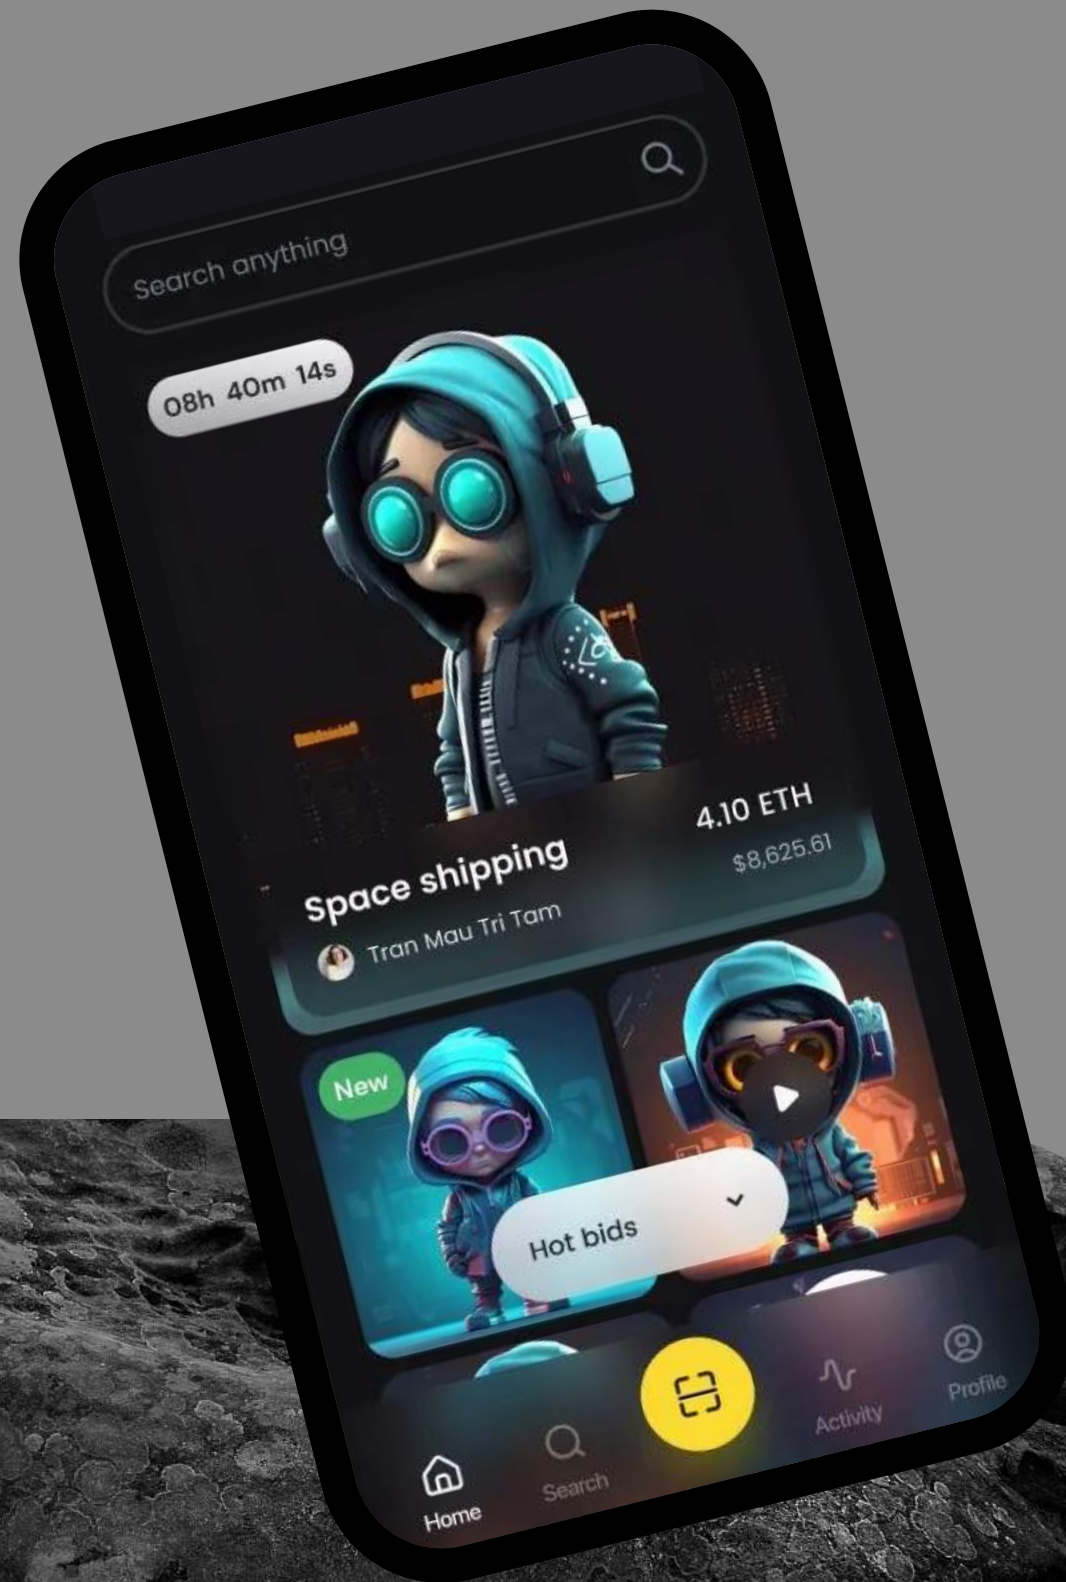

Crypto Collectible Project ——

Created on Tron Blockchain, Artwork enables users to collect other users' art and reproduce it to make a unique artwork. The project is backed with smart contracts that facilitate secure ownership transfer of these blockchain-secured digital art pieces.
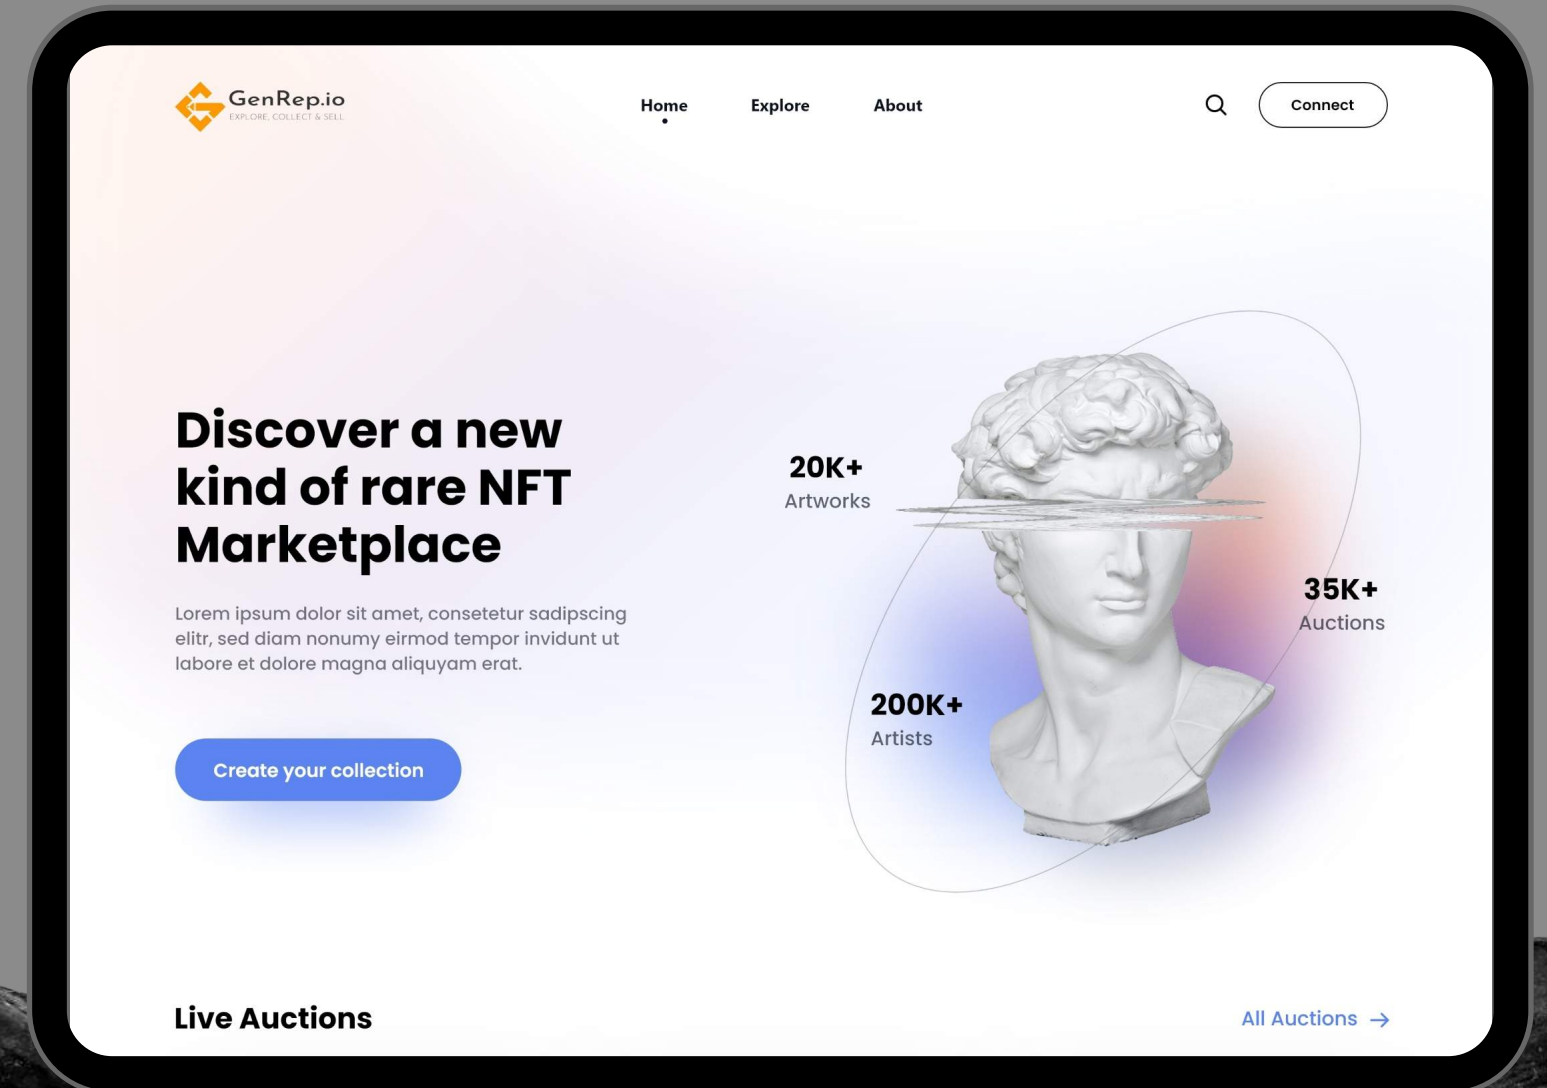

QUYTECH
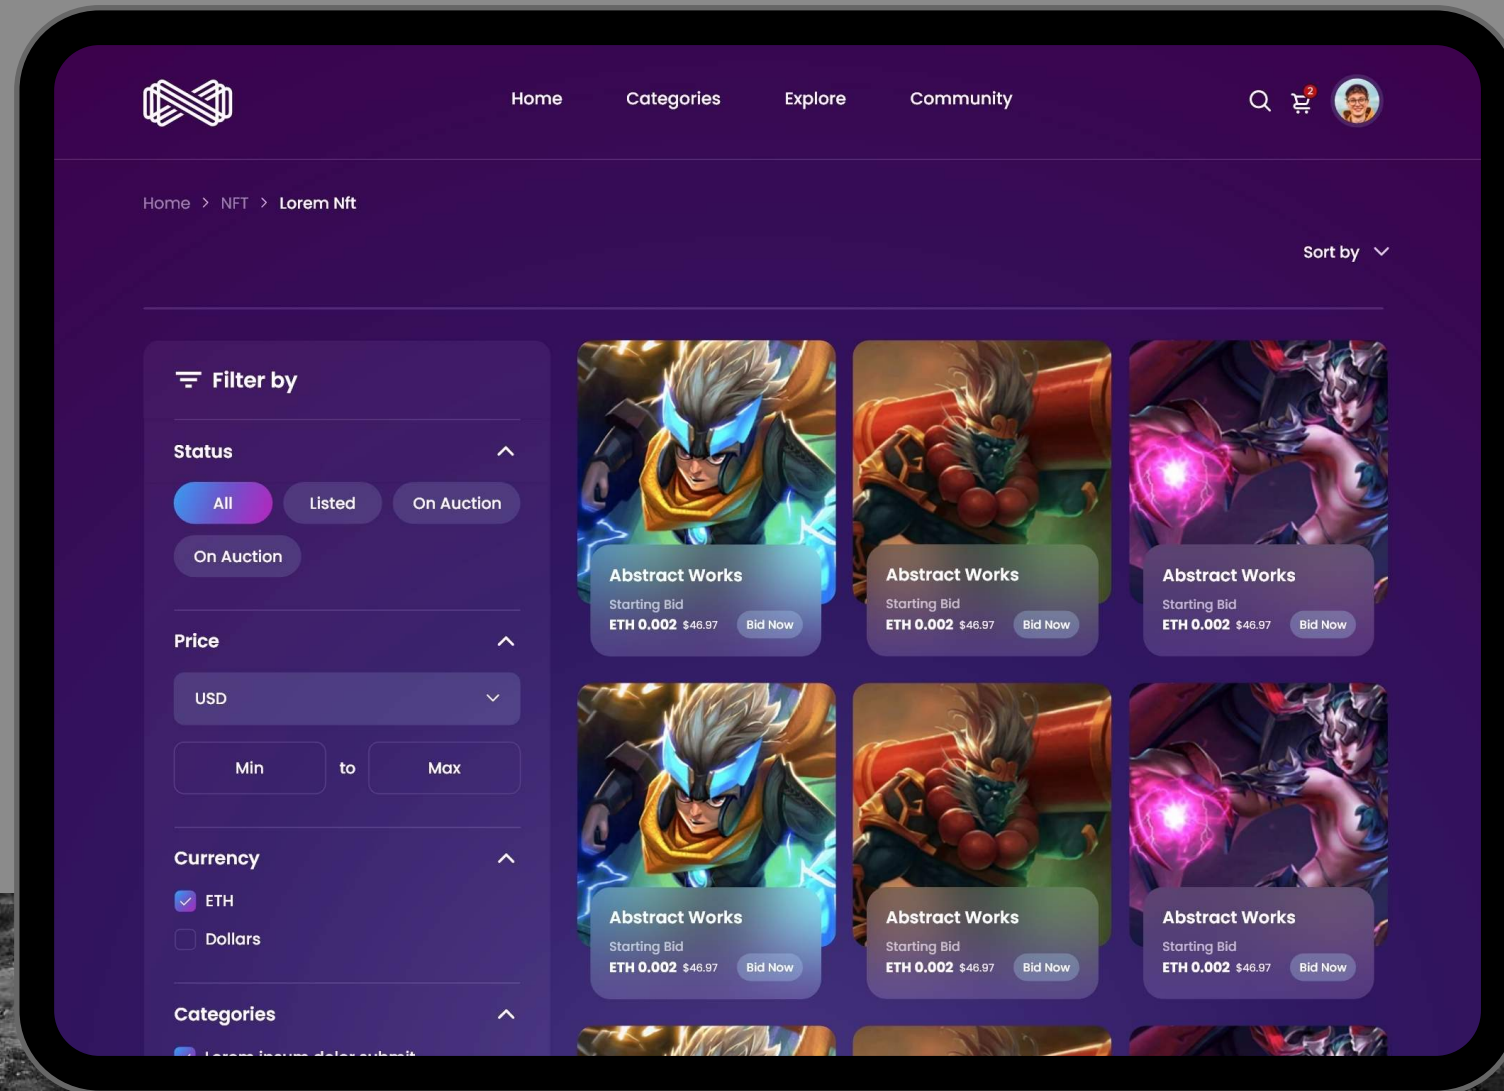

MBD Finance ————

Backed by AI and blockchain, MBD Financial is a one-of-its-kind E-commerce aggregator web3 platform that allows vendors to sell digital, physical, and Phygital products.

www.quytech.com

QUYTECH

Digital NFT Marketplace ———

Genrep.io is the NFT gaming marketplace for the game called Minage, an MMORPG game with in-game reward tokens and advanced dashboard and gaming controls. Users can buy and sell characters and game accessories on this marketplace.

Hyperia APP ——

Quytech has developed Hyperia, using the Ethereum blockchain, to protect the IP of content creators. It enables creators to register the IP, create and sell their custom content, and transfer content ownership using smart contracts.

www.quytech.com

Niftysouq NFT Marketplace ———

NEW NiftySouq is an NFT marketplace launched specifically in the MENA region. It allows artists to convert their digital art into NFTs for trading. We migrated the entire NFT marketplace from the Solana platform and moved it to the Polygon chain without any disruption.

QUYTECH
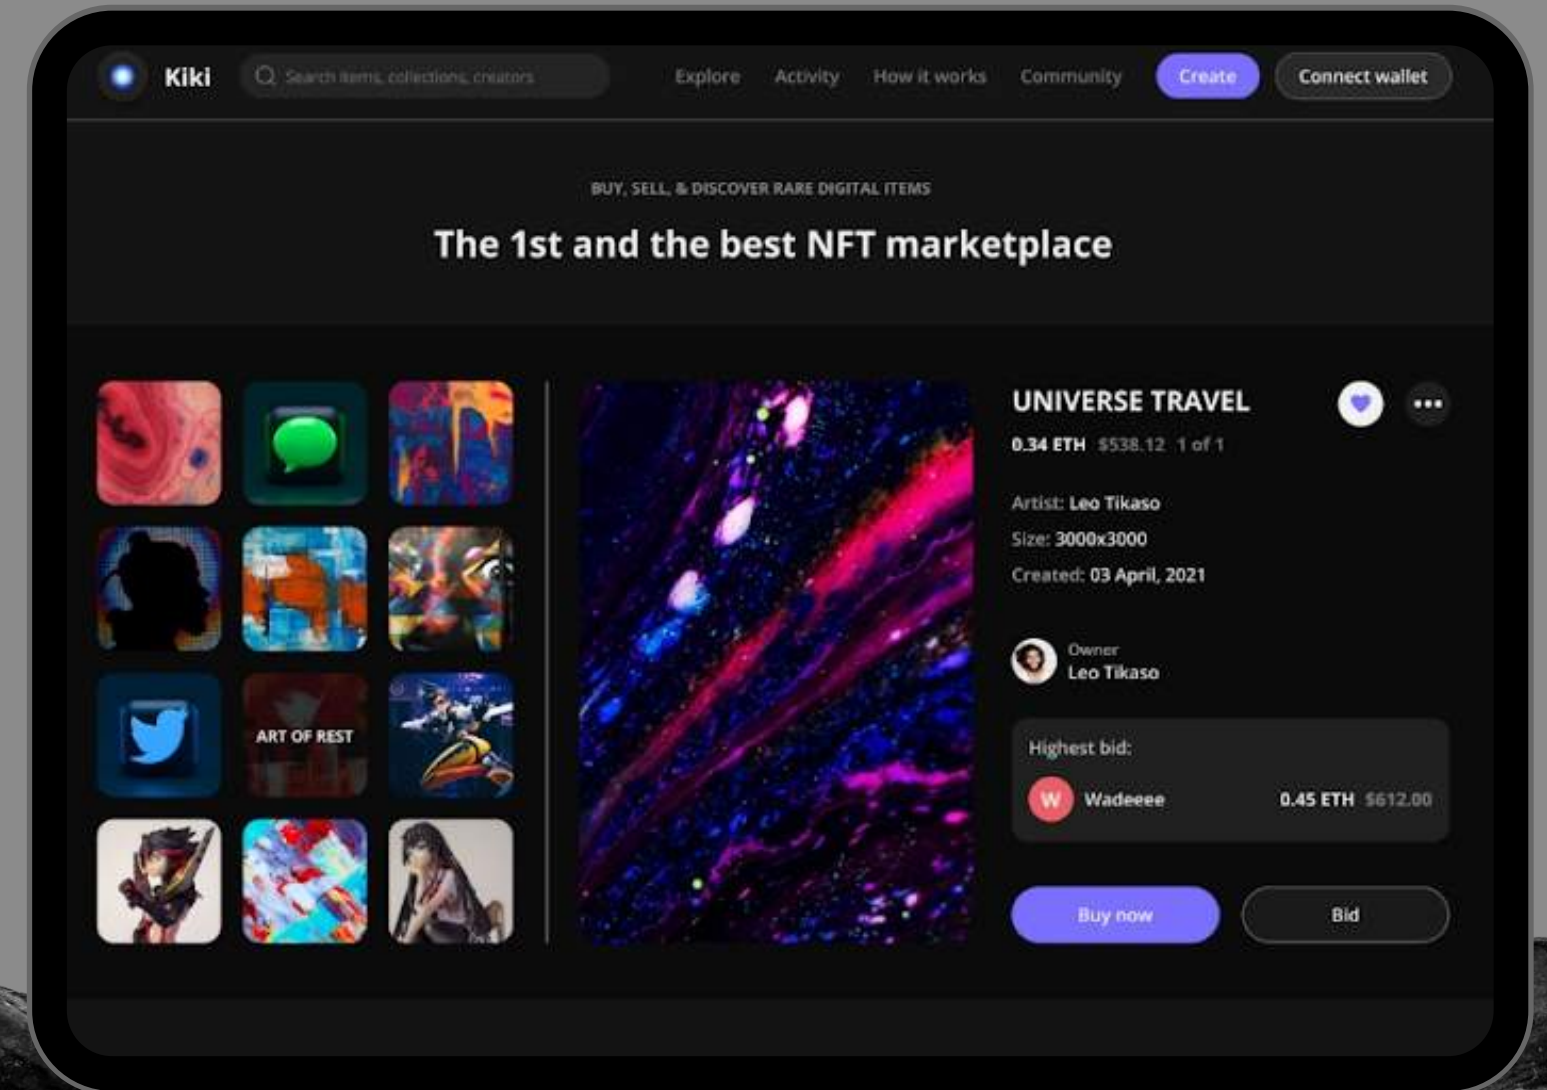

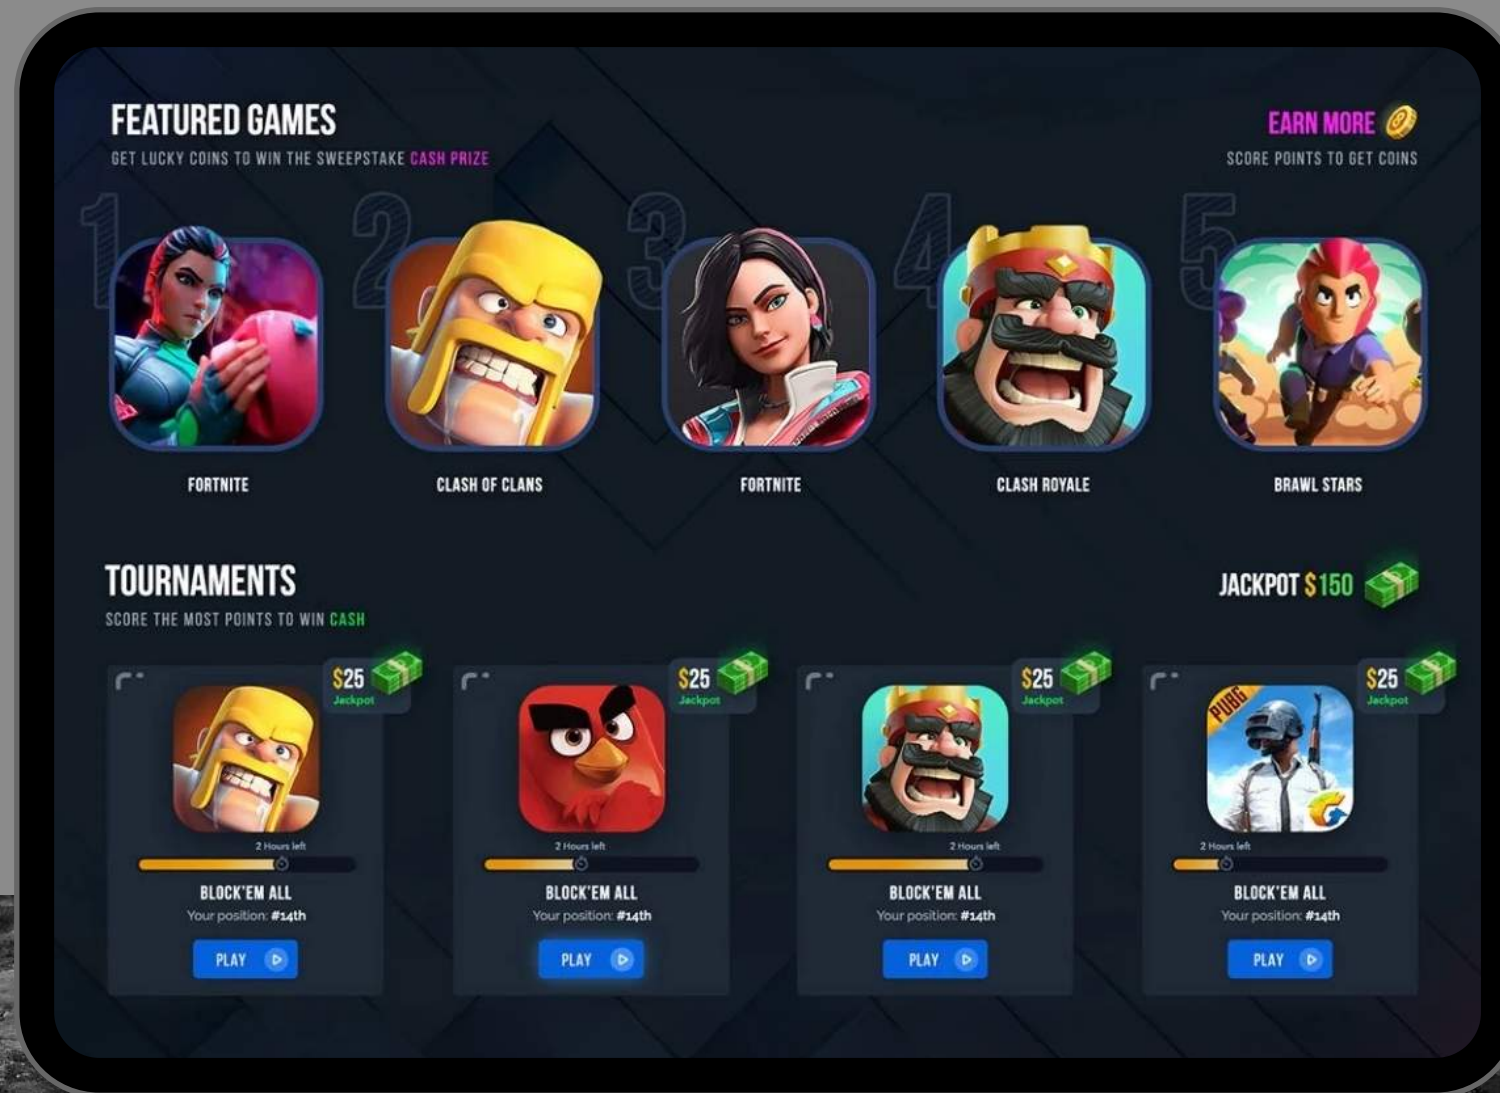

Nomadland - NFT Gaming ——

NEW Built on the Binance Smart Chain, Nomadland is an NFT gaming app with play-to-earn model. Each player in the app is provided with a Hero NFT to participate and win amazing in-game reward tokens (NOMAD Tokens).

Cryptocurrency Exchange ——

Quytech has developed a feature-rich cryptocurrency exchange platform that lets users trade digital currencies against other digital currencies. For security and convenience, it is equipped with AML integration, multi-currency pairing, and other top features.
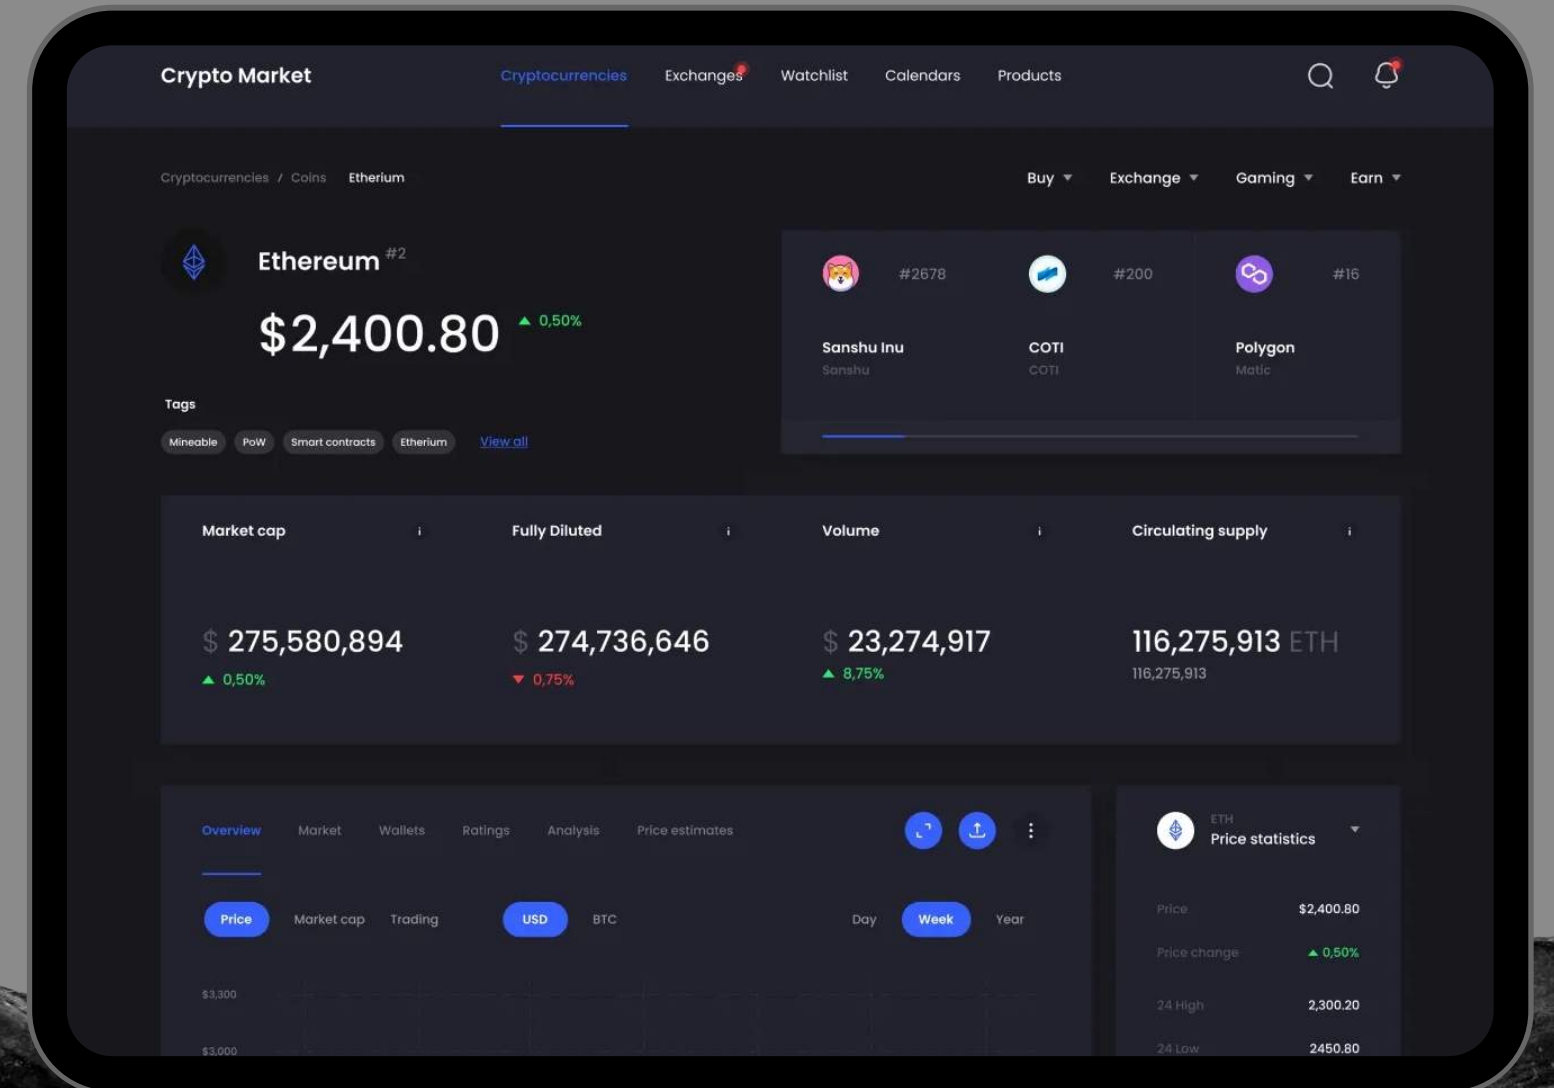

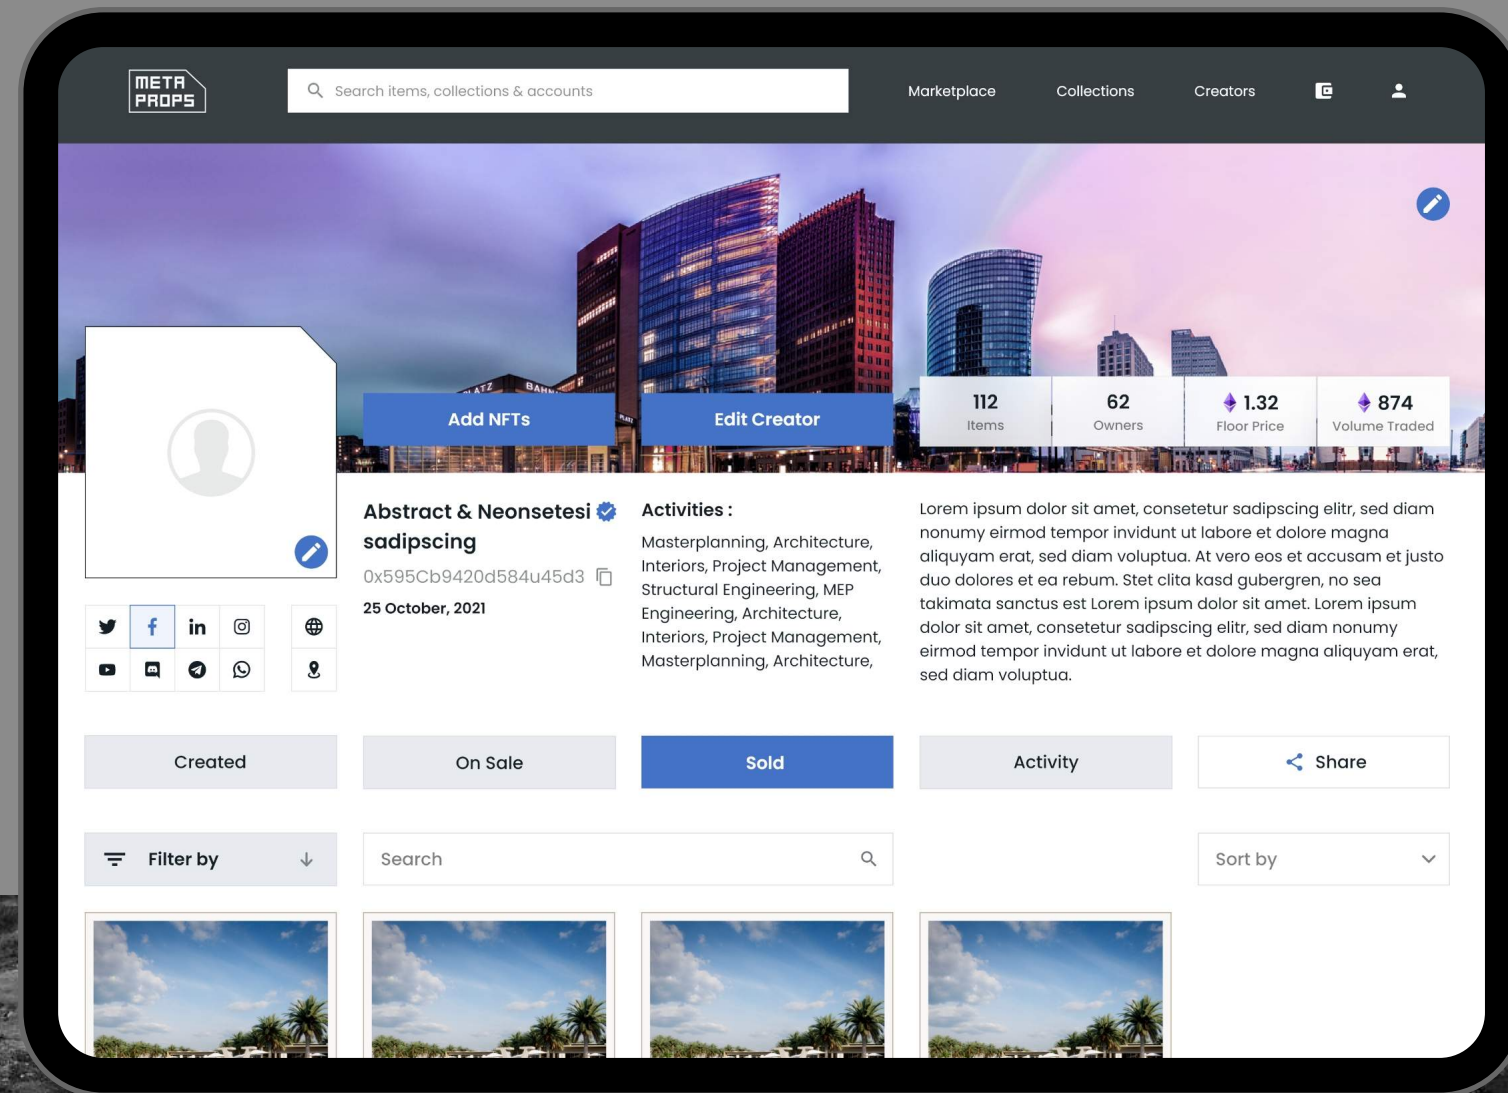

Blockchain-Based Real Estate NFT Marketplace

We have created a scalable NFT marketplace, using Polygon, Flow, and BSC, for commercial architects to enable them to display their architectural designs in an immersive environment. Multiple wallet (Matic & Metamask) integrations set it apart from others.

Stage 5

Some of Our Metaverse Work

Pvp Roblox Game ——

Quytech developed a team-up PvP Roblox game where players have to defend their base and destroy other players' beds using different resources to win. It has become players' favorite Roblox game in no time.

Mini-Show Game In Decentraland

Quytech has developed a mini-show game in Decentraland where gamers play in single-player mode and compete with other players. The game offers free giveaways and has an in-game currency MANA, which can be traded in for fiat currency.

Outdoor Sandbox Land Game ——

In this Outdoor Sandbox Land Game that Quytech has developed, players have to search for treasures to kill medieval enemies and skeletons and collect coins. They can use a sandbox to get the freedom to be creative with their gameplay or building materials.
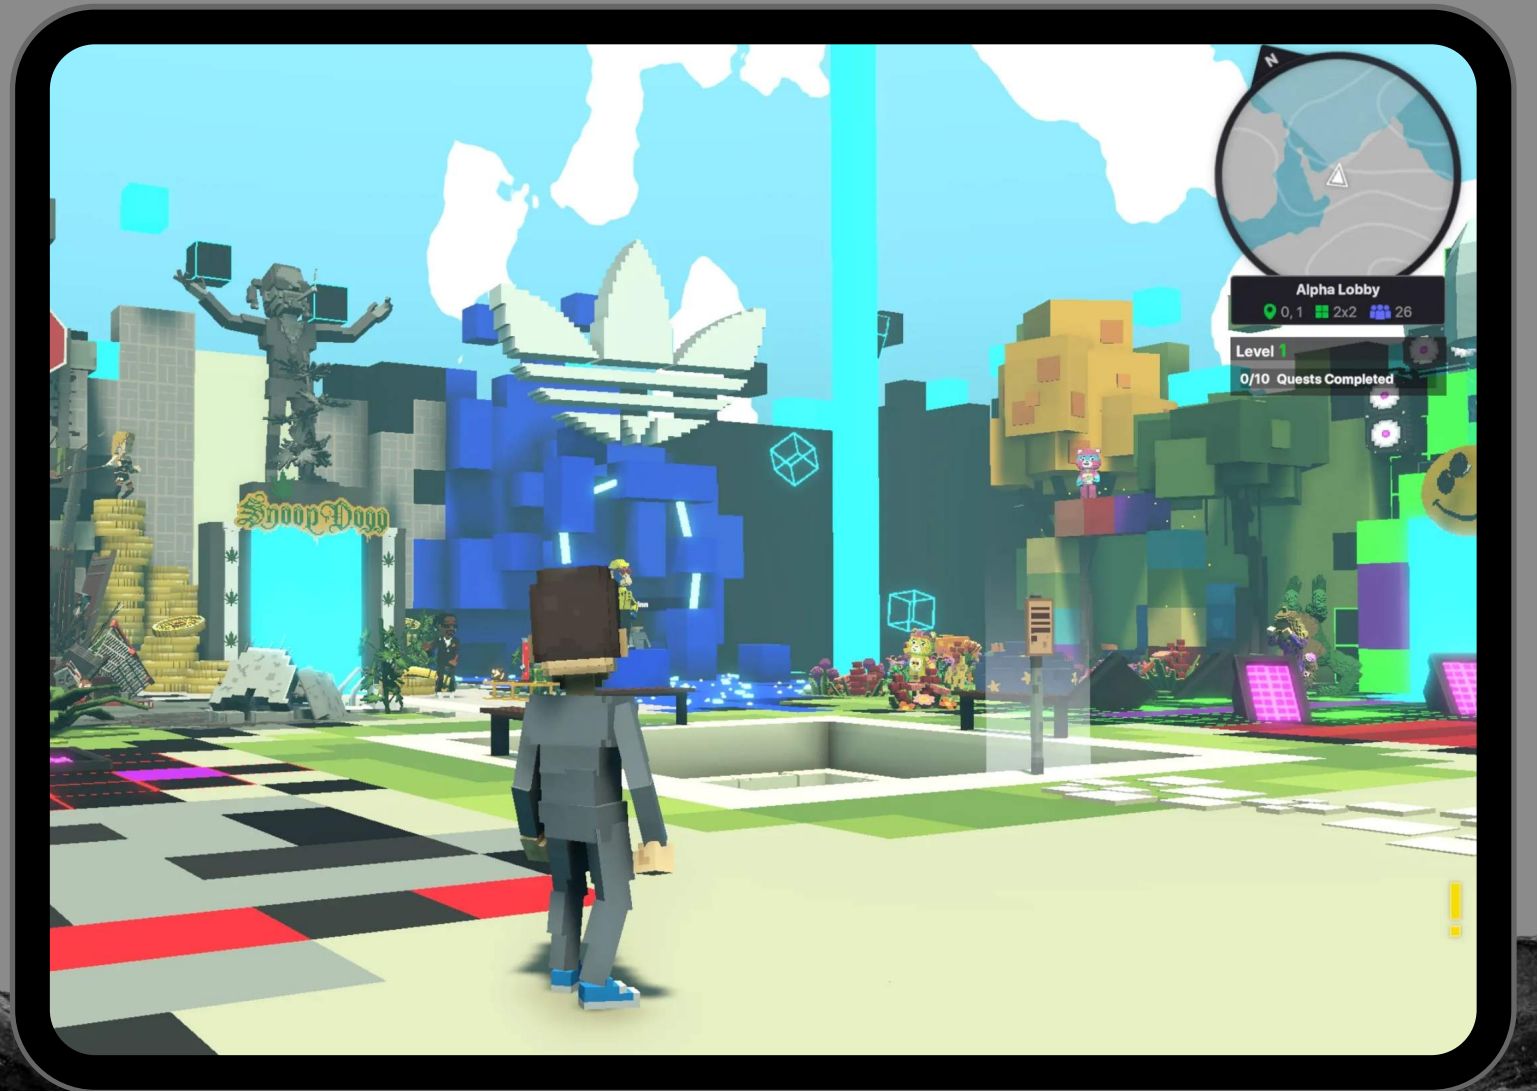

Versailles Heroes ——

Versailles Heroes is an NFT-eSport Game developed by Quytech with blockchain technology. You can form a team with your friends to join battles and start earning with your skills. It combines the Free-to-Play and Play-to-Earn models.

Car Buying Experience In Metaverse

Quytech has developed a Metaverse Cars Tour solution that allows customers to explore new cars, choose a car configuration, select the exterior and interior color, open doors, and switch on the light. They can even access an online configurator to take a test drive.
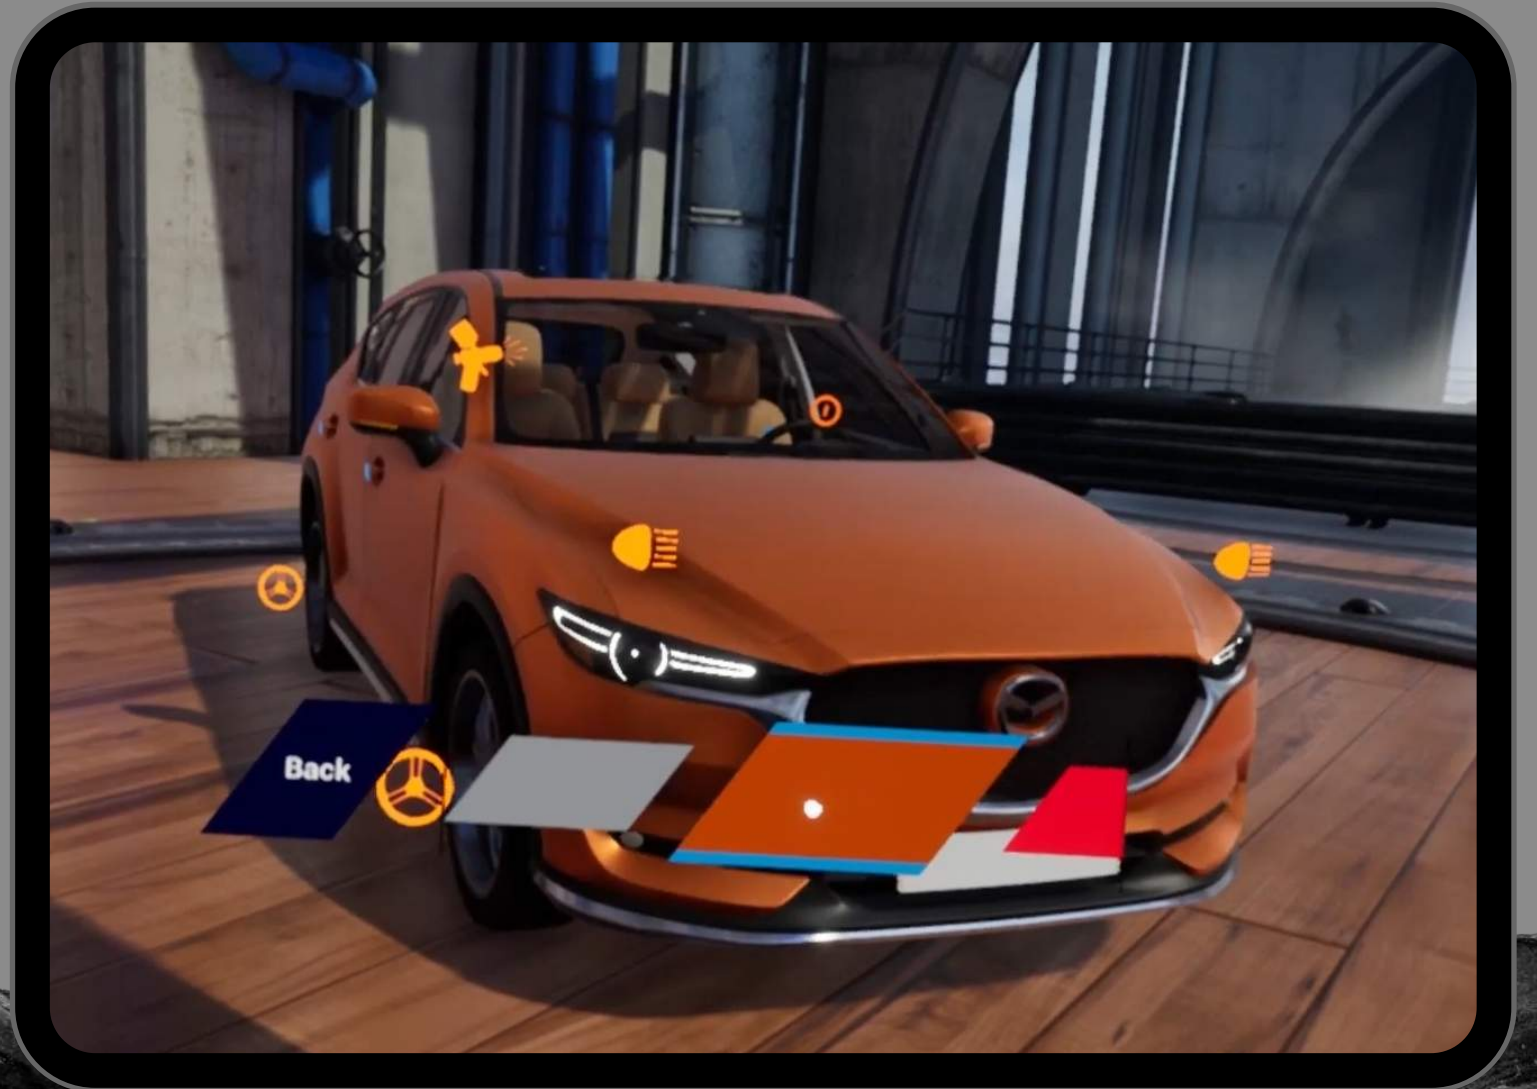

Change Management And Behavioral Training

Quytech has created Metaverse Training for Behavior Change to offer an immersive environment that enables learners to improve skills and change behaviors through realistic practice.

NFT Car Racing Game ──

We have created an NFT-based Car Racing Game for one of the reputed organizations. This racing game features a collection of real car brands with an extensive and intuitive background in both cars and games.

Business Conference In Metaverse

Quytech has created a metaverse platform for a reputed firm to enable them to promote brands, hold conferences, virtual meetings, and organize events, and much more in a lifelike environment.

Holotar ——

We built a Metaverse solution, using Photon and Unity, for web and mobile, where users can join the virtual room, invite friends, and have discussions using voiceovers and chat. They can change their avatars and see others' activity in the virtual space.

So I have taught you something new.

I didn't know that!

Wormhole ———

Built and created to explore live interactive tours. Wormhole allows users to create 360-degree scans, populate the world with interactive content, and share it with others who join them as avatars to meet, chat, shop, and play.
